

Real caravans for the outback

Family van sample layouts

Bushtracker, the family van experts! Over the last 22 years we have custom designed hundreds of family vans from as small as 14 feet all the way up to 24 feet. We have many innovative designs to use as a starting point, but the real beauty is that being a custom builder, the van is ultimately built to your design.

Please contact one of our friendly staff and let us know the size of family van you are looking for so that we can provide you with some pricing and designs based on this.

Layouts do not affect your price. We coach you on your layout for about ten weeks or so from the time you order, while your suspension is being built and chassis components are being galvanised. Lifestyle choices and gear list can affect the layout, but you can have just about anything you want that works. However, some of the Optional Equipment can affect your Layout; so you really need to complete that list first, for your copy please [CONTACT US](#) and we will e-mail it to you.

After talking with you about gear and style of travel, we can then get a group of layouts for you to work with. Normally, you would have a bit of a play with them, and then we would redraw it to scale to suit your needs. Layouts should really be your last concern, as we have said: You can have anything you want that works.

In this document there are various layouts to consider, but again they are only samples of directions to go in, there would be 20 to 50 variations for each one.

More interior photos and layout ideas can be seen on the Bushtracker owner's forum at: [PICTURE GALLERY OF HIGH END TOP FINISHES](#)
